

## PRODUCTSPECIFICATION

### ABUS Titalium Close Shackle Padlock

Although many of our padlocks are designed for use in normal outdoor conditions, this titanium / aluminium alloy padlock is marine grade and capable of withstanding the most extreme conditions including salt water environments.

The stainless steel shackle is also protected by extended side walls making saw and bolt cropping attacks much more difficult and therefore making it a CEN insurance approved padlock up to grade 3.

The precision 5 pin tumbler with self-locking mechanism make the padlock highly secure against picking, while the steel shackle and double bolted case help protect the lock from force attacks. The Titalium material is high security, lightweight and corrosion resistant ensuring the lock will function well outdoors.

### Lock Types & Details:

90/50 Titalium Close Shackle Padlocks	Diagram 1		Diagram 2		ABUS GPS	Weight kg	Box qty
ABUS Reference Number	mm	mm	mm	mm			
90/50	50 / 75 / 23	19 / 21.5 / 9.5	8	0.374	6
